Hunter Tiffany

age: 38
residence: Columbia, SC
education: Associate Degree in Logistics Management
occupation: Warehouse Operations Supervisor
marital status: Married, three children

"If the system slows us down, we're losing money."

Carlos manages daily warehouse operations including inventory tracking, shipment coordination, and staff scheduling. He spends most of his day on the warehouse floor and uses the website mainly to: 1. Check inventory levels. 2. Track incoming/outgoing shipments. 3. Manage employee schedules. 4. Generate reports for management. He values speed, accuracy, and simplicity. He does not have time to learn complicated systems and prefers straightforward dashboards.

Criteria For Success:

Carlos feels successful when:

- Inventory data is accurate and updated in real time
- Shipments are processed without delay
- Reports are easy to generate
- His team meets efficiency targets

Needs

- Real-time inventory tracking
- Clear dashboard with shipment status
- Fast loading pages
- Reliable system with minimal downtime
- Support from upper management for implementation

Wants

- Barcode scanning integration
- Automated low-stock alerts
- Mobile-friendly design
- Simple one-click reporting
-

Values

- Efficiency
- Organization
- Clear communication
- Operational control

Fears

- Inventory errors causing shipment delays
- System crashes during peak hours
- Losing productivity due to slow technology
- Being held responsible for operational failures

MOBILITY LABS

Robert Jenkins

age: 63
residence: Columbia, South Carolina
education: High School Diploma, 30+ years industry experience
occupation: Owner of a small warehouse
marital status: Married, two grown children

I've been doing this a long time and I keep doing it—I just need something reliable that doesn't overcomplicate things.

Robert oversees the entire warehouse operation, from inventory and shipments to managing employees and client relationships. He spends time both in the office and on the warehouse floor. He prefers simple systems and often relies on experience rather than technology, but understands that modern tools are necessary to stay competitive.

Criteria For Success:

Smooth daily operations without confusion
Reliable tracking of inventory and shipments
Employees can use the system without constant help
Minimal downtime or technical issues
Ability to quickly understand reports

Needs

- Very simple and intuitive interface
- Clear and readable data (no clutter)
- Strong reliability and stability
- Basic training or onboarding support
- System that works well on desktop

Wants

- Easy-to-read dashboards
- Printable reports
- Simple navigation (few clicks)
- Customer support that's easy to reach

Values

- Reliability
- Simplicity
- Experience and practicality
- Consistency
- Trust in systems

Fears

- Technology being too complicated
- Employees struggling to use the system
- Losing data or making costly mistakes
- Wasting time learning something confusing
- Falling behind competitors due to poor systems

education: Associate Degree in Political Science
occupation: Warehouse Manager
marital status: Single

I don't need something fancy, I just need it to work fast and not slow down my team.

Carlos starts his day early by checking inventory levels and shipment schedules. Most of his time is spent on the warehouse floor managing staff, tracking incoming and outgoing goods, and solving issues as they come up. He uses the system throughout the day to quickly check data, update records, and make decisions without slowing down operations.
